

SUMMARY

Information Systems student at Telkom University with hands-on experience in cybersecurity research, full-stack web development, and technical team coordination. I have built end-to-end software solutions from scratch, conducted structured security research, and led practicum coordination for hundreds of students. Experienced in writing clean code across multiple stacks, performing code reviews, and designing automated workflows that improve operational efficiency. Passionate about building systems that are not only functional, but secure, scalable, and impactful.

EDUCATION

Telkom University – Bachelor of Industrial Engineering

Information System · GPA: 3.96

2023 - Present

EXPERIENCE

Information Technology Operation Intern

Matchako Indonesia

Mar 2026 - Present

Designed system architecture for a Partner Management System (PMS) with real-time monitoring, focusing on data integrity and seamless transaction recording across partner locations. Spearheaded digital transformation of partnership operations – defining technical specifications and validation flows to ensure data consistency before deployment. Collaborated with stakeholders to verify functional and non-functional requirements ensuring deliverables met operational standards

Skills: Process Automation · Systems Design · Web Development · Inventory Management

Cyber Security Research Assistant

MBC Laboratory

Oct 2025 - Present

Conducted systematic security research on IoT vulnerabilities and wireless communication flaws, documenting detailed findings and technical reports. Led hardware security testing using Flipper Zero to identify and analyze security flaws through structured experimentation. Participated in national CTF competitions. Compiled comprehensive technical reports translating findings into actionable recommendations.

Skills: Penetration Testing · CTF · IoT Security · Cybersecurity · Kali Linux · Technical Reporting

People Development – Cyber Security Division

MBC Laboratory

Oct 2025 - Present

Curated and managed structured skill-building programs and certification roadmaps for cybersecurity lab assistants. Evaluated national and international CTF competitions aligned with technical roadmap. Aligned human resource capabilities with research objectives through collaboration with leads.

Skills: Penetration Testing · CTF · IoT Security · Cybersecurity · Kali Linux · Technical Reporting

Assistant Coordinator – Object Oriented Programming Course Practicum

EAD Laboratory

Feb 2026 - Present

Led team of teaching assistants for Object-Oriented Programming (Java) practicum, standardizing documentation and structured workflows. Conducted performance evaluations and code reviews, providing constructive feedback on code quality, best practices, and design principles.

Skills: Java · OOP · Code Review · Team Leadership · Documentation

Secretary & Web App Development Practicum Assistant

EAD Laboratory

Aug 2025 - Jan 2026

Provided technical guidance on full-stack web development using Laravel, PHP, and JavaScript; facilitated lab sessions and conducted code reviews. Managed end-to-end Accountability Reporting (LPJ) for four core practicum courses, ensuring compliance and documentation accuracy.

Skills: Laravel · PHP · MySQL · HTML · JavaScript · Web Development · Documentation

Media and Information Staff

BPM SI Telkom University

Oct 2024 - Feb 2025

Managed digital content creation and social media strategy for organizational communications. Executed video editing and publication design workflows.

Skills: Video Editing · Design · Content Management · Teamwork

Design and Publication Team

Tel U Education Movement (TEAM)

Dec 2023 - Jan 2025

Designed and developed motion graphics and video content, managing design workflow for publication materials across major events. Ensured brand identity consistency and timely delivery.

Skills: Motion Graphics · Graphic Design · After Effects · Video Editing

Member

Google Developer Groups On Campus (GDGoC) – Telkom University

Dec 2023 - Oct 2024

Active member in developer community focused on Google technologies and open-source development.

Skills: Google Workspace · Git · GitHub · JavaScript · Python · HTML5 · CSS

PROJECTS

SecureAudit

React · Flask · Python

[Github](#)

Security tool that scans repositories for vulnerable code patterns, classifies findings by severity, and visualizes results via a React dashboard. Full SAST pipeline: input to static analysis to severity-graded report. Mirrors real-world QA defect triage and security gate workflows.

Internal Practicum Assistant Management

Next.js · TypeScript · Node.js · Express

[Github](#)

A web-based internal management system built from scratch to replace a fragmented multi-spreadsheet workflow, centralizing attendance and assesment tracking for 564 students across 13 shifts, assistant scheduling, and operational documentation into one integrated dashboard.

FloodSense

TypeScript · Next.js · React

[Github](#)

Community-driven flood reporting platform for Indonesia that collects real-time citizen reports, routes them through a credibility-scoring and staff verification pipeline, and visualizes flood severity across regions via an interactive map and analytics dashboard.

TypeScript · React · Tailwind CSS

Integrated healthcare platform with patient care management, appointment scheduling, and health monitoring. Complex multi-module system requiring rigorous functional and UI validation across user roles.

TypeScript · React · Vite

Learning Management System built under hackathon constraints for laboratory resource management, assignment tracking, and student-instructor collaboration. Delivered against strict time and requirement bounds.

Python · Jupyter · Pandas

Exploratory data analysis for water quality assessment - data cleaning, visualization, and pattern recognition across quality indicators. Demonstrates structured data validation and reporting.

Python · Jupyter · Machine Learning

Predictive ML model for credit risk assessment. Validates borrower risk profiles and tests model accuracy against historical data - applying systematic validation methodology.

Software QA & Test Automation Engineering Specialization
